4. OC was the only office that has done anything concrete about the program and the rest of the meeting was devoted primarily to what steps might now be taken within General Cabell's slot and money limitations to get the rest of the show on the road. It seems no one is going to ask for either additional slots or money at this time, with the exception of TSS.

7. It was agreed OSI and TSS needed to draw up specific outlines of their requirements before OTR could enter into discussions with them concerning their problems. We will be expected to coordinate the various courses so that there will be no needless duplication and inform all interested parties as to the total instruction which is available. It was pointed out that eventually this instruction would be listed as courses either in the OTR Course Catalogue or appropriate individual component catalogues, such as that of the Office of Communications.

8. There was great interest by the OSI, ELINT Staff and TSS representatives as to how they might get some people into the JOT Program. I told them to give their specific requirements to the Office of Personnel and through their respective Training Officers to contact C/JOTP.
